

# ABTIN NOURAN

## JAVASCRIPT-DEVELOPER

Creative, detail-oriented, developer with a deep interest in AI. Proven track record of creating and implementing successful front and back end web applications. Looking to bring my skills to a tech company with global reach.

---

## WORK EXPERIENCE

**Jan 2023 – June 2023**

Software Developer Internship at Yayloh, Stockholm

- Collaborated on various aspects of the company's software development process, including branding, coding, and testing.
- Designed custom UI/UX elements that reflected the client's unique style.
- Developed skills in React and gained hands-on experience with AWS and serverless computing.
- Enhanced SQL skills by working with the company's well-structured database.
- Wrote test cases and gained expertise in automated testing using Cypress and CI/CD with GitHub Actions.

**Aug 2022 – Oct 2022**

Software Developer Internship at Nilo, Stockholm

- Led a website redesign project, creating designs in Figma and collaborating with the team to refine the design.
- Implemented design changes using React and Sass, bringing the new design to life on the website.
- Acquired valuable experience in web design and development, learning new tools and techniques while working on a real-world project.
- Gained insights into the design process and practical experience working with React and Sass.

---

## PROJECTS

**Bra-Bygg - a CRUD project with Node.js**

- Developed a feature-rich application with authentication, error-handling, file uploads, and database management.
- Implemented three distinct user roles (Admin, Worker, Client) with specific interactions and permissions.
- Admin role had authority over user account creation and deletion.
- Worker role could create tasks, write related messages, and upload pictures linked to the tasks.
- Client role could view tasks, write messages related to tasks, and interact with workers.

**Sinius - An e-commerce website for a skateboard shop with Vue.js**

- Built an e-commerce platform with features including secure authentication, cart and checkout functionality, and a "liked items" page.
- Implemented a filtering feature for users to easily browse and find products based on their preferences.
- Showcased front-end development skills and created a user-friendly shopping experience.
